

## PORTABLE LPG SHOWER TRAILERS

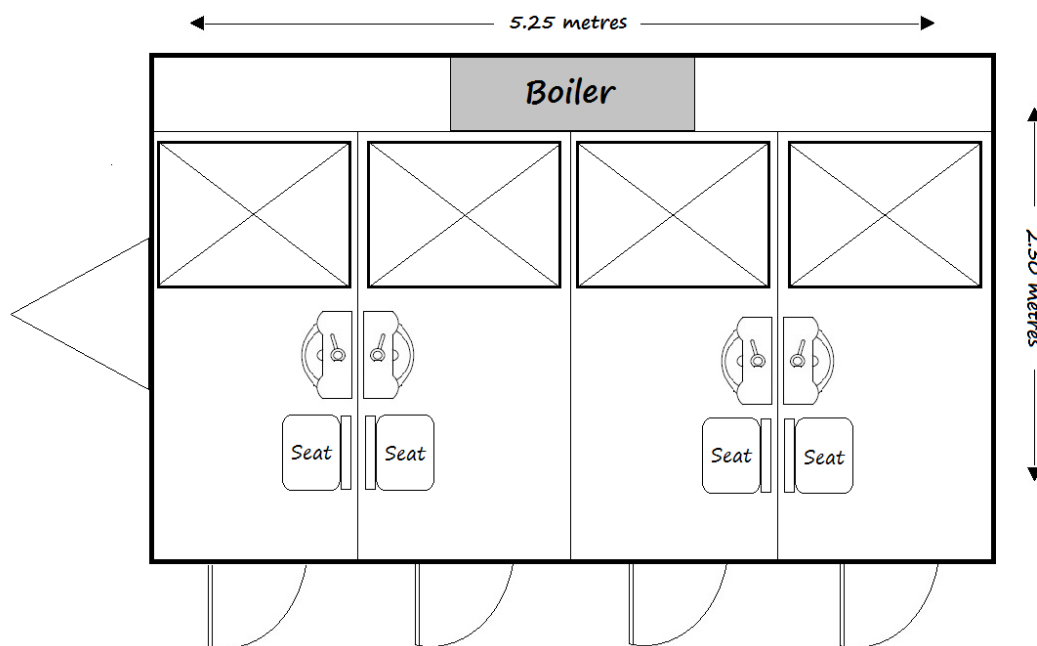

### Luxury shower units

Our luxury shower units consist of four separate shower cubicles all accessed via their own door from outside. Each cubicle has a changing area, seat and hand wash sink. Each of the individual showers is unisex.

These units have an LPG boiler for heating the water along with a buffer tank and pump which assists in areas where the water pressure may be low. **These units require an electrical power supply to be connected at all times during use** as well as a reasonable water supply and provision for the waste water. *Please see Connection of Water & Power Factsheet for full details.*

#### 4 Bay LPG Shower Trailer

#### Please note -

**All units are set up and tested at the time of delivery so please ensure that the water connection and power supply are available at that time. We cannot take any responsibility for the malfunction of shower units due to poor water pressure or contaminated supply.**

**If you're not sure about any of the above please give us a call on 01597 811 177 for friendly & helpful advice.**
