

Points to consider before booking

LUXURY PORTABLE TOILET TRAILERS

Do I need water, electricity & waste connections?

Luxury toilet trailers are self-contained and therefore require no water or waste connection. They do, however require a 240 volt 16Amp connection to a power supply, this can be mains or generator. This power supply should be available on site at the time of delivery to allow our driver to set up the unit prior to leaving site. All units are delivered with a 20m power cable. *Please see Connection of Power & Water Factsheet for full requirements.*

What will be supplied with the toilets?

Luxury toilet units are supplied fully stocked with toilet tissue, paper towels, soaps, tissues and hand sanitiser. Additional toilet tissue can be provided to event organisers to restock during their event if required, please ask for a quote for this.

Is there adequate access for a delivery vehicle?

Luxury toilet trailers are normally delivered using a 4 x 4 vehicle. Please ensure that any gate openings etc. provide adequate space for access, if in doubt please discuss before booking.

Where do I plan on siting the units?

You'll need to plan to site the unit where they can easily be unhitched and also collected, this needs to be a level location. Bad weather can prove problematic when delivering or collecting units, it is our drivers' decision as to whether the ground condition is suitable when making a delivery. If the location is inaccessible they will make alternative suggestions.

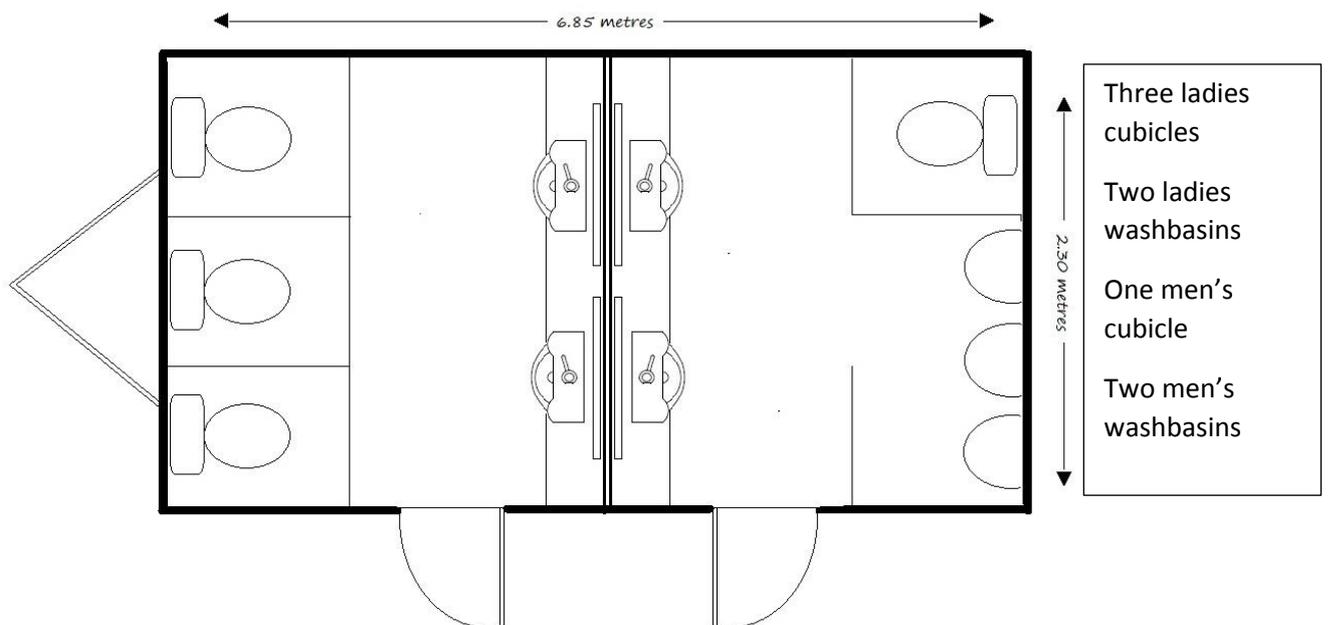

When will the units be collected?

We will endeavour to collect the hire units as soon as possible after the hire period is over, however it may take up to 5 days to collect the units during which time they are the responsibility of the hirer. If you have collection deadlines for your event please make this clear when you are enquiring or booking.

What will the layout of the unit be inside?

These do vary but to give you an indication please see our most popular unit outlined below.

Brechfa 3 + 1 Luxury Toilet Unit

If you're not sure about any of the above please give us a call on 01597 811 177 for friendly & helpful advice.
