

Points to consider before booking

PORTABLE LPG SHOWER TRAILERS

Do I need water, electricity & a waste connection?

Shower trailers require a reasonable water supply, provision for waste water and a 240 volt 16 Amp power supply. These services should be available on site at the time of delivery to allow our driver to make all connections. The shower trailer will then be set up and tested prior to us leaving the site. Please note that we cannot take any responsibility for the malfunction of shower units due to low water pressure. *Please see Connection of Water & Power Factsheet for full details.*

What will be supplied with the showers?

All shower trailers are supplied with one 19Kg LPG cylinder with additional cylinders available if required. Please ask for a quotation. All units are delivered with a 20m power cable. We aim to bring sufficient water (10m of 25mm alkathene) & waste pipe (10m) to site, please notify the office when booking if you have additional requirements..

Is there adequate access for a delivery vehicle?

LPG shower trailers are normally delivered using a 4 x 4 vehicle. Please ensure that any gate openings etc. provide adequate space for access, if in doubt please discuss before booking.

Where do I plan on siting the unit?

You'll need to plan to site the unit where they can easily be unhitched and also collected. Bad weather can prove problematic when delivering or collecting units, it is our drivers' decision as to whether the ground condition is suitable when making a delivery. If the location is inaccessible they will make alternative suggestions. All shower trailers should be sited on a level location as near to your water supply as possible.

When will the units be collected?

We will endeavour to collect the hire units as soon as possible after the hire period is over, however it may take up to 5 days to collect the units during which time they are the responsibility of the hirer. If you have collection deadlines for your event please make this clear when you are enquiring or booking.

If you're not sure about any of the above please give us a call on 01597 811 177 for friendly & helpful advice.
